

Private

I have concluded to broach
to you, a most painful Subject.
First stating, that insanity, although
a new feature, in our family history, first
appeared within my knowledge, in the
case of my own daughter, at the early
age of Thirteen - for six months, she was
so decidedly flighty, as to be closely
guarded - her back from infants
is scarred its length. At the birth of
each child, the same symptoms were
shown, and severely felt; particularly
by her husband, and myself -

At no time, has she ever been nat-
-ural in her demeanor -

God pity those who are the victims -
and who are the anxious sufferers
in such terrible afflictions!

Private

I have enclosed to you
to you a small number of
last October, and I have
a new edition in my hands
of your letter and the
copy of my own translation
of the text. I have also
in the margin of the
quarto. The text of
is enclosed in a separate
sheet. The text of
them, and I have
by the hand, and
There are two
not in the
part of the
and the
in such
